Data Summary

Data size of one month

- 1.2 GB
- Over 10 million rows

Duration

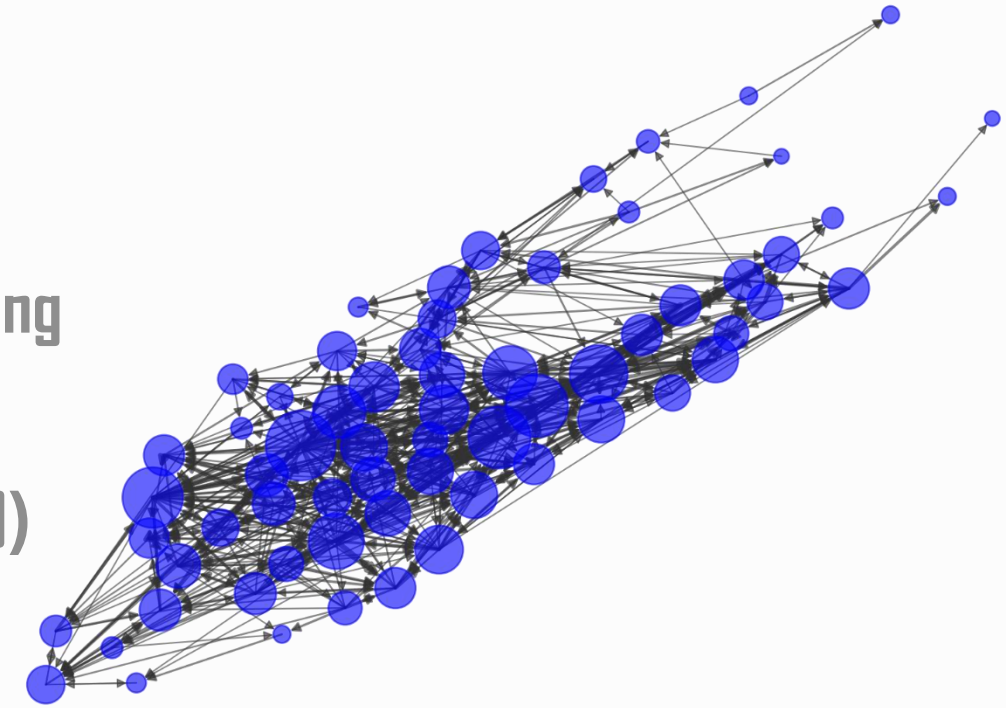
- Single trip/Matching pair:
  - Focus on 2015/07 – 2016/06
- Passenger privacy:
  - 2009/01 – 2016/06, 217 GB in total

Generate Index

1

Index for travelling time / tip

- Why use index?
- Components:
  - Weather:
    - use wunderweather API + mapping
  - Location:
    - k-means clustering(k = 50 / 100)
  - Pick up Time:
    - month, weekday, hour



Single Trip

Predict travelling time / tip

- Multiple linear regression(MapReduce)
  - Find parameters of regression through Cholesky decomposition

Sample Results

- Location index and hour index statistically significant

Matching Pair – Prediction

Most Similar Trip

- Sum of squared difference (MPI)
- Single difference (MapReduce)

Results

- Mean squared error (MapReduce)
- Compare with dummy regressors (MapReduce)

Matching Pair – Causality

Most Similar Trip

- Fixed effect (MapReduce)
  - Control five indices
  - Sum of absolute difference

Results

- Simple linear regressions (MapReduce)

Passenger Privacy

Motivation

- 2009/01 ~ 2016/06: latitude and longitude
- 2nd Annual NYC TLC Hackathon (2016/10)
- 2016/07 ~ 2017/12: area code
